To answer the question, globalization decreased poverty, however, it increased inequality in India and China. The Effect of Globalization on China Due to globalization and the introduction of exporting and importing, the economy spiked up. People would import petroleum for a price and export it for another, causing inequality (Bardhan 3).

The Effect of Globalization on China and India by Dana ...

Inequality in India and China: Is Globalization to Blame? Globalization undoubtedly has many complex and unintended consequences. However, Pranab Bardhan, economist at University of California, Berkeley, argues that globalization cannot be credited as either an evil force responsible for rising inequality or a virtuous one behind falling poverty rates in the developing world.

Inequality in India and China: Is Globalization to Blame ...

The aim of this chapter is to assess the strategy behind and the outcomes of the Indian response to economic globalization and subsequently briefly compare it to the path chosen by China. India and China are often seen as following the same basic development strategy—an open market-based liberalizing strategy—with China starting early and India belatedly following.
