'Nations under God: The Geopolitics of Faith in the Twenty-First Century' is a timely contribution to the on-going discussion on religion and politics. The volume brings together over thirty leading scholars from a variety of disciplines such as political science, international relations theory, sociology, theology, anthropology, and geography. Franklin, Jack, Marla, Thadius, and Caitlin... this unlikely group of assorted misfits are the Cemeterians, a group that will take on any job - no, really, we mean any bloody job (money's a bit tight right now)! Trudge through disgusting sewers to battle manatee-massacring mermaids and soggy cultists, creep through creepy, fog-littered cemeteries straight out of an ancient Hammer Film soundstage, confront undead lecherous lodgers and other assorted beasties, creepies, and ghoulies. It all comes down to whether an adolescent giant Automaton, a truly mad, Mad Scientist, a surly Necromancer, a Banshee's granddaughter, and a reluctant furry monster straight from under your little sister's bed can manage not to kill each other - or, at least, quit fighting over the tele-privilege-schedule long enough to get the job done! Not likely.

All-terrain vehicles (ATV), which are off-road motorized vehicles, usually with four tires, a straddle seat for the operator, and handlebars for steering control, have become increasingly popular. However, ATV fatalities and injuries have increased over the last decade and are a matter of concern to the Consumer Product Safety Comm. (CPSC), which oversees ATV safety, and to others. Many ATV crashes involving children occur when they are riding adult-sized ATVs. Manufacturers and dist have agreed to use their best efforts to prevent their dealers from selling adult-sized ATVs for use by children under the age of 16. This report examined: (1) how ATVs are used and the advantages of their use; and (2) the nature, extent, and costs of ATV crashes. Illus.

This practical and helpful volume details how clinicians can work through various common challenges in individual, couple, or group psychotherapy. Chapters draw upon clinical wisdom gleaned from the author's 48 years as a practicing psychiatrist to address topics such as using countertransference for therapeutic purposes; resistance, especially when it needs to be the focus of the therapy; and a prioritization of exploration over explanation. Along with theory and clinical observations, Dr.Gans offers a series of "Clinical Pearls," pithy comments that highlight different interventions to a wide range of clinical challenges. These include patient hostility, the abrupt and unilateral termination of therapy, the therapist's loss of compassionate neutrality when treating a couple, and many more. Many of the "Clinical Pearls" prioritize working in the here-and-now. In addition to offering advice and strategies for therapists, the book also addresses concerns like the matter of fees in private practice and the virtue of moral courage on the part of the therapist. Written with clarity, heart, and an abundance of clinical wisdom, Addressing Challenging Moments in Psychotherapy is essential reading for all clinicians, teachers, and supervisors of psychotherapy.

Tunnels and Underground Cities: Engineering and Innovation meet Archaeology, Architecture and Art. Volume 10: Strategic use of underground space for resilient cities contains the contributions presented in the eponymous Technical Session during the World Tunnel Congress 2019 (Naples, Italy, 3-9 May 2019). The use of underground space is continuing to grow, due to global urbanization, public demand for efficient transportation, and energy saving, production and distribution. The growing need for space at ground level, along with its continuous value increase and the challenges of energy saving and achieving sustainable development objectives, demand greater and better use of the underground space to ensure that it supports sustainable, resilient and more liveable cities. The contributions cover a wide range of topics, from investing in urban underground space, via effective use of underground space for sustainable cities, and the use of new energy carriers to the compound use of underground space for integrated campus-urban development. The book is a valuable reference text for tunnelling specialists, owners, engineers, archaeologists, architects, artists and others involved in underground planning, design and building around the world, and for academics who are interested in underground constructions and geotechnics.
