The 2nd International Symposium on Medical Data Analysis (ISMDA 2001) was the continuation of the successful ISMDA 2000, a conference held in Frankfurt, Germany, in September 2000. The ISMDA conferences were conceived to integrate interdisciplinary research from scientific fields such as statistics, signal processing, medical informatics, data mining, and biometrics for biomedical data analysis.

About the Workshop. The Second International Workshop on Thoracic Image Analysis aims to bring together medical image analysis researchers in the area of thoracic imaging to discuss recent advances in this rapidly developing field. COVID-19 infection has brought a lot of attention to lung imaging, and the role of CT imaging in the diagnostic workflow of COVID-19 suspects is an important research topic.

Aside from data analysis, another medical office career option is a job as a medical secretary. In this job, you would schedule patient appointments, handle insurance issues and answer phones. Although no formal education is required, completing a postsecondary program can improve your job prospects.

Multilevel analysis can take the hierarchical structure of the data into account in a way that none of the previously discussed approaches does, and enables correct analysis at each of the three levels: learning group ( $k$ ), student ( $j$ ), and repeated measurement ( $i$ ). The appropriate multilevel model is a three-level mixed-effects model.
